ORDINANCE NO. 51 - A

AN ORDINANCE AUTHORIZING AND DIRECTING THE PROPER OFFICERS OF THE TOWNSHIP OF WILKINS, FOR AND ON BEHALF OF THE TOWNSHIP, TO MAKE AND ENTER INTO A WRITTEN CONTRACT WITH THE PENNSYLVANIA WATER COMPANY, FOR THE FURNISHING OF WATER TO THE TOWNSHIP OF WILKINS, FOR FIRE PROTECTION, PROVIDING FOR THE INSTALLATION OF FIRE HYDRANTS, THEIR OPERATION AND MAINTENANCE, AND FIXING THE RATES OF CHARGES FOR WATER SERVICE.

SECTION I: Be it ordained and enacted by the Commissioners of the Township of Wilkins, in meeting assembled, and it is hereby ordained and enacted by the authority of the same, that the proper officers of the Township of Wilkins are hereby authorized and directed to make and enter into a written contract with the Pennsylvania Water Company in the following form:

AGREEMENT made and executed in duplicate this 20 day of April A.D., 1915, by and between the Pennsylvania Water Company, a corporation of the State of Pennsylvania, party of the first part, and Wilkins Township, in the County of Allegheny, of the said State, party of the second part.

WHEREAS, the Commissioners of Wilkins Township wish to provide for fire protection to the residents and property owners of that portion of the said Township lying to the North of the Borough of Turtle Creek and West of Thompson's Run; NOW THIS AGREEMENT WITNESSETH:

Water Co. hereby agree to furnish the said Wilkins Township with water for the extinguishment of fires through Thirteen (13) fire hydrants as may hereafter be located under the provisions of this contract. A list of the pipe to be laid and the hydrants to be set at the present time is attached hereto and made a part of this agreement.

Fire Hydrants SECOND: That all fire hydrants which may be set under this contract shall be double nozzled with the same hose thread and with the same seized operating nut as those now in use in the Borough of Turtle Creek and shall open by turning in the same direction.

IAA027

No Liability  
For Failure  
To Supply.

THIRD: That the said first party shall not be held or deemed liable for any damages occurring by reason of temporary failure to supply water when such failure is owing to any accident to or breakage of its pumping machinery, water mains, reservoirs or other parts or appliances of its plant or system, if same happens without negligence on the part of said first party or arises from any cause beyond the control of said first party or is caused by the shutting off of the water for the purpose of making necessary repairs or extensions to its system.

Repairs to  
Fire Hydrants.

FOURTH: That the said first party shall keep all fire hydrants covered by this contract in effective working order and repair all leaks within forty-eight (48) hours after the receipt of notice from the Chairman of the Board of Commissioners, Chairman of Water Committee, or other proper official.

Cost of Main-  
tenance of  
Fire Hydrants.

FIFTH: That the said first party shall and will maintain the said fire hydrants at its own cost and expense (except in the case of damage caused by carelessness or negligence on the part of the employees of said Wilkins Township or members of its Fire Department, in which case the Township shall pay such cost and expense) and upon written request from the Chairman of Board of Commissioners, Chairman of Water Committee or other proper official, shall provide a proper person to accompany the authorized agent or representative of the Township in the inspection of same, said person to perform all necessary manual labor and said inspection to be made at convenient hours and reasonable intervals.

Use of Fire  
Hydrants.

SIXTH: That the said Township agrees to use the said fire hydrants carefully and will not allow any water to be taken from them for private consumption or for any other purpose whatever except the extinguishment of fires unless by the consent of said first party, first had and obtained in writing.

Additional  
Fire Hydrants.

SEVENTH: That the Township shall locate as its Commissioners may deem necessary, such additional fire hydrants on pipe lines now laid or that may hereafter be laid or at such places as may require the laying of additional pipe to reach and supply them. Upon receipt of written notice to do so, the first party shall proceed at its own expense to furnish, set and connect the hydrant or hydrants ordered. Said additional hydrant or hydrants and any additional pipe which may be required to reach them, shall be paid for at the rate provided for in Section 9 hereof, and shall be controlled, governed and regulated in like manner with the Thirteen (13) hydrants herein contracted for.

Inspection,  
License, Tax,  
Etc.

EIGHTH: That if during the term of this agreement, the Board of Commissioners of Wilkins Township or its successor should deem it advisable to provide for the inspection of the mains of the said first party, it is hereby agreed that the said inspection shall be made without cost to the first party, as part of the consideration for the service rendered by the said first party in supplying fire protection, and it is further agreed as a part of the consideration of this contract, that the Township shall not, during the term of this contract, impose any license, tax or charge upon the property, franchise or business of the Water Company, which would diminish the returns to be paid to the Water Company.

NINTH: In consideration of the carrying out of the above provisions of this agreement on the part of the Pennsylvania Water Company, Wilkins Township agrees to pay therefor at the rate of Two Hundred Seventy-five & no/100 Dollars (\$275.00) per year per mile of distribution pipe line of the said first party within the Township limits of the said Wilkins Township as said limits exist at the present time or as they may be altered by the annexation of additional territory in the future and the additional sum of Six & no/100 Dollars (\$6.00) per year from each fire hydrant now in service, or that shall be installed on written order of the Township, as provided in Section 7 hereof. Bills for service will be presented quarterly and shall be due and payable within thirty (30) days thereafter.

Rates

Provided, however, that for distribution lines laid within the Township limits on streets forming the boundary lines between Wilkins Township and other municipalities, the Township shall pay for the whole of such lines, but the Water Company shall refund to the Township such sums as it may collect for the use of such lines by such adjoining municipalities for municipal purposes as may be necessary to equitably apportion such charges between the Township and such municipalities; and to this end Wilkins Township agrees to co-operate with the Pennsylvania Water Company in arranging for such equitable apportionment in all cases affecting the Township.

TENTH: That for the purpose of fixing the compensation provided for in Section 9 of this agreement, it is hereby agreed that the number of miles of distribution pipe lines to be laid in Wilkins Township by the party of the first part under this agreement is 6324 feet or 1.1977miles, as shown by the schedule of pipe lines hereto attached and marked "Exhibit A", and that the number of fire hydrants to be placed in service on said pipe lines is Thirteen (13) as shown by list of said fire hydrants Marked "Exhibit B" and attached hereto. It is further agreed that the pipe and hydrants listed in Exhibits A and B shall be furnished and installed by the party of the first part within Ninety (90) days after the approval of this agreement by the Public Service Commission of the Commonwealth of Pennsylvania as required by the Public Service Company Law.

Basis of  
Computation.

For the purpose of determining what shall from time to time be paid under this contract, it is further agreed that the schedule of Exhibit A shall be increased by the lengths of the extensions of the distribution pipe system which may hereafter be laid to furnish proper and adequate service to Wilkins Township or the owners of property within the said Township: Provided, however, that in case the party of the first part should extend its distribution pipe lines within the Township to reach unimproved property or property from which there is no demand for a supply of water at the time the extension is made, (the cost of said extension being advanced by the owner or owners of the property petitioning the first party for said extension) the distribution pipe line or lines so laid shall not be included with that upon which the bills for fire protection shall be based; but upon application for a domestic supply of water for a property located on such an extension of the distribution pipe system within the limits of Wilkins Township and the repayment by the party of the first part of a part or all of the cost which was advanced to it for the laying of said line, the, all of said extension or such part of it as is represented by the amount of the cost repaid shall be included in the distribution pipe system of Wilkins Township upon which the annual rate per mile shall be computed.

ELEVENTH: This agreement shall go into effect as of 20th of April 1915, and shall continue in force and be binding on both parties for the term of ten (10) years from that date.

IAA027

TWELFTH: It is hereby understood and agreed that it is the obligation of this contract, if and when approved by the Public Service Commission of the Commonwealth of Pennsylvania, such as to impair or in any way affect the exercise by said Commission of any of the powers vested in it by the Public Service Company Law approved July 26th, 1913.

IN WITNESS WHEREOF, the said Pennsylvania Water Company has hereunto caused its common and corporate seal to be affixed, duly attested by the officers thereof and the Chairman of the Board of Commissioners and the Secretary of the said Wilkins Township, pursuant to an Ordinance of said Board of Commissioners approving this contract, passed on the 20th day of April, 1915, copy of which is hereto attached and marked "Exhibit C", have hereunto signed their names and caused the Township seal to be affixed, duly attested by the Secretary of the Board of Commissioners.

In such case proceedings shall not be stayed otherwise than by a restraining order, which may be granted by the Board of Adjustment or by a court of record on application, on notice to the Building Inspector from whom the appeal is taken, and due cause shown.

(2) To hear and decide special exceptions to the terms of this Ordinance upon which such Board is required to pass under this Ordinance or any supplements thereto.

(3) To authorize upon appeal, in specific cases, such variance from the terms of the Ordinance as will not be contrary to the public interest, where owing to special conditions, a literal enforcement of the provisions of the Ordinance will result in unnecessary hardship and so that the spirit of the Ordinance shall be observed and substantial justice done.

In exercising the above mentioned powers, such Board may in conformity with the provisions of this Ordinance, revise or affirm, wholly or partly, or may modify the order, requirement, decision, or determination appealed from and may make such order, requirement, decision or determination as ought to be made and to that end shall have all the powers of the Building Inspector from whom the appeal is taken.

The back forms shall remain in place for at least 24 hours after pouring concrete. As soon as the curbing has received its final finish it should be covered with wetted burlap, double thickness. The burlap shall be kept moist for 72 hours after pouring curbing.

After the curbing has been cured, the space in the pavement side shall be backfilled with coarse aggregate from the top of the tile underdrain to the level of the subgrade and the space along the back of the curb shall be backfilled with coarse aggregate to a distance 12" below the top of the curb.

#### Subgrade.

After curbs, storm sewers, water lines, gas lines, and sanitary sewers (if any) have been constructed, the subgrade shall be formed, to the required elevation and cross-section by shaping the roadway surface with approved materials and shall be brought to a firm, thoroughly compacted surface for the full width of the pavement, by rolling with a power roller weighing not less than ten (10) tons. All unsuitable material which will not compact satisfactorily shall be removed and replaced by satisfactory material as directed by the engineer.

#### Base Course

Base course shall be eight (8) inches in depth after final compacting.

##### A. Materials

Coarse aggregate shall be broken stone Pennsylvania Department of Highways, Type B, Number 4 slag or air cooled blast furnace slag of the quality commercially known as Run of Bank Blast Furnace Slag.

##### B. Methods of Construction.

The base course shall be constructed in two (2) courses. The bottom course shall be spread and rolled three (3) to four (4) inches in depth.

The coarse aggregate for the top course shall then be placed and leveled to the required elevation and cross-section in

IAA027

such manner as to avoid segregation of the finer material. All lumps over six (6) inches in their maximum dimension shall be broken up or removed. The base course shall then be thoroughly compacted by rolling with a ten (10) ton three (3) wheeled roller. The rolling shall start at the curb line, progress to the center, be parallel to the center line, of the roadway, uniform lapping each preceding track and covering the entire surface with the rear wheels, and continuing until the material does not wave or creep ahead of the roller wheels. As the rolling progresses the surface shall be checked with templates and straight edges and material removed or added as required to bring the surface to a true-cross-section. After the coarse material has been satisfactorily rolled, Pennsylvania IB slag shall be uniformly spread over the surface and rolled and broomed until the voids are filled satisfactorily.

#### Surface Course.

The bituminous material for the surface course shall be tar or asphalt but shall not be applied unless the air temperature is over fifty (50) degrees F.

The surface course shall be either of premixed material compacted to a minimum thickness of one and one-half ( $1\frac{1}{2}$ ) inches after rolling or of penetrated material of two (2) inches thickness after rolling. If the penetrated surface course is used, it shall be made up of stone or slag ranging from one (1) inch to one-half ( $\frac{1}{2}$ ) inch, and the bituminous material placed with an approved distributor truck at the rate of a total of two (2) gallons per square yard, with a final rolling after chips have been applied for the seal coat.

If the premix material is used the base course shall be swept clean and shall receive a tack coat of asphalt applied at the rate of fifteen one hundredths (0.15) gallons per square yard, before the premix material is placed.

4. Storm sewers must be constructed and catch basins (Allegheny County Standard) provided, in accordance with the approved preliminary plans at all locations shown thereon.

5. All bituminous materials shall conform to all the requirements of the Pennsylvania Department of Highway Specification, Form 408, January 1941, and all supplements thereto which are in effect. The subdivider shall furnish at his own cost a certificate of approval from an approved Testing Laboratory for all bituminous materials.

6. An inspector shall be placed on all work in connection with the streets and alleys; to be furnished by the Township, and the cost of these services shall be born by the subdivider.

SECTION II: Before acting upon any such type of application or upon any such plan, the Board of Commissioners may, in their discretion, arrange for a public hearing after giving such notice as they may deem advisable in each case. The Board of Commissioners are authorized to alter such plans, or order the same to be altered, and to specify any changes or modifications of any kind which they in their discretion, may deem necessary with respect thereto and may make their approval of such plans and applications, changes or modifications.

SECTION III: Any such application, and the plans for the same, when so approved, shall be signed, on behalf of the Board of Commissioners by the President of the Board of Commissioners, countersigned by the Secretary of the Board of Commissioners, with the Township seal annexed.

SECTION IV: Upon final action of the Board of Commissioners in approving any such application or petition for making any road, street, or alley, or the drainage facilities of the same part of the public road system of the Township of Wilkins, County of Allegheny, and State of Pennsylvania, an approved copy of the plan of said road, street or alley or the drainage facilities thereof shall be recorded by the corporation, person or persons applying for such approval in the office of the Recorder of Deeds or the County of Allegheny, upon proof being offered by the said corporation, person or persons to the Board of Commissioners of said Township that the plan for said road, street or alley and

IAA027

drainage facilities have been dully recorded in the Recorders office of Allegheny County; the said Township of Wilkins by its Board of Commissioners shall by resolution duly accept the said road, street or alley and drainage facilities therefor, or any part of the same, as part of the public road and street system of the Township. Provided, however, that no road, street or alley or plan of lots shall be considered for approval by the Board of Commissioners until the petitioner at his, her or its expense shall first grade, pave, curb, install storm sewers and comply with all of the provisions of this ordinance; and provided further, however, that the Township of Wilkins shall do no work of any kind in or upon such road, street or alley, and shall have no responsibility of any kind with respect to such road, street or alley or drainage facilities of the same until ten (10) days after the passing of the resolution accepting and ordaining the said road, street or alley or drainage facilities, or a plan of the same, as part of the public road and street system of the Township of Wilkins. Provided further, that nothing herein contained shall prevent the laying of trunk sewers, storm sewers, water or gas mains, if required by engineering necessity for the accommodation of other territory.

SECTION V: Nothing contained in this ordinance shall be held to restrict or limit the State Department of Highways, or of the County of Allegheny, in the exercise of any of its duties, powers and functions under the provisions of any act of Assembly now in force, or hereafter to be enacted.

SECTION VI: That any ordinance or part of any ordinance conflicting with the provisions of this ordinance be and the same is hereby repealed.
