Be it ordained and enacted by the Commissioners of the Township of Wilkins, in meeting assembled, and it is hereby ordained and enacted by the authority of the same, that the proper officers of the Township of Wilkins are hereby authorized and directed to make and enter into a written contract with the Pennsylvania Water Company in the following form:

Agreement made and executed in duplicate this 20th day of April A.D. 1915, by and between the Pennsylvania Water Company, a corporation of the State of Pennsylvania, party of the first part, and Wilkins Township, in the County of Allegheny, of the said State, party of the second part.

Whereas, the Commissioners of Wilkins Township wish to provide for fire protection to the residents and property owners of that portion of the said Township lying to the North of the borough of Turtle Creek and west of Thompsons Run; Now This Agreement Witnesseth:

Water Company to furnish fire protection

First: That the said Pennsylvania Water Company does hereby agree to furnish the said Wilkins Township with water for the extinguishment of fires through thirteen (13) fire hydrants to be located in the said Wilkins Township on pipe lines of the said first party, which are to be laid for the purpose of supplying said fire hydrants and such other fire hydrants as may hereafter be located under the provisions of this contract. A list of the pipe to be laid and the hydrants to be set at this present time is attached hereto and made a part of this agreement.

Fire Hydrants.

Second: That all fire hydrants which may be set under this contract shall be double nozzled with the same hose thread and the same sized operating nut as those now in use in the borough of Turtle Creek and shall open by turning in the same direction.

No liability for failure to supply

Third: That the said first party shall not be held or deemed liable for any damages occurring by reason of temporary failure to supply water when such failure is owing to any accident to or breakage of its pumping machinery, water mains, reservoirs or other parts or appliances of its plant or system, if same happens without negligence on the part of said first party or arises from any

cause beyond the control of said first party or is caused by shutting off of the water for the purpose of making necessary repairs or extensions to its system.

Repairs to Fire Hydrants.

Fourth: That the said first party shall keep all fire hydrants covered by this contract in effective working order and repair all leaks within forty-eight (48) hours after the receipt of notice from the Chairman of the Board of Commissioners, Chairman of Water Committee, or other proper official.

Cost of Maintenance of fire hydrants.

Fifth: That the said first party shall and will maintain the said fire hydrants at its own cost and expense (except in a case of damage caused by carelessness or negligence on the part of the employees of said Wilkins Township or members of its fire department, in which case the Township shall pay such cost and expense) and upon written request from the Chairman of Board of Commissioners, Chairman of Water Committee or other proper official, shall provide a proper person to accompany the authorized agent or representative of the Township in the inspection of same, said person to perform all necessary manual labor and said inspection to be made at convenient hours and reasonable intervals.

Use of fire hydrants.

Sixth: That the said Township agrees to use said fire hydrants carefully and will not allow any water to be taken from them for private consumption or for any other purpose whatever except the extinguishment of fires unless by the consent of said first party, first had and obtained in writing.

Additional Fire Hydrants.

Seventh: That the Township shall locate as its commissioners may deem necessary, such additional fire hydrants on pipe lines now laid or that may hereafter be laid or at such places that may require the additional laying of pipe to reach and supply them. Upon receipt of written notice to do so, the first party shall proceed at its own expense, set and connect the hydrant or hydrants ordered. Said additional hydrant or hydrant and any additional pipe which may be required to reach them, shall be paid for at the rate provided for in section nine hereof, and shall be controlled, governed and regulated in like manner with the thirteen (13) hydrants herein contracted for.

Inspection, License, Tax, etc.

Eighth: That if during the term of this agreement, the Board of Commissioners of Wilkins Township or its successor should deem it advisable to provide for the inspection of the mains of the said first party, it is hereby agreed that the said inspection shall

be made without cost to the first party, as part of the consideration for the service rendered by the said first party in supplying fire protection, and it is further agreed as a part of the consideration of this contract, that the Township shall not, during the term of this contract, impose any license, tax or charge upon the property, franchise or business of the water company, which would diminish the returns to be paid to the water company.

Rates.

Ninth: In consideration of the carrying out of the above provisions of this agreement on the part of the Pennsylvania Water Company, Wilkins Township agrees to pay therefor at the rate of Two hundred seventy-five and 00/100 dollars ($275.00) per year per mile of distribution of pipe line of the said first party within the Township limits of the said Wilkins Township as said limits exist at the present time or as they may be altered by the annexation of additional territory in the future and the additional sum of Six and 00/100 dollars ($6.00) per year for each fire hydrant now in service, or that shall be installed on written order of the Township, as provided in Section 7 hereof. Bills for service will be presented quarterly and shall be due and payable within thirty (30) days thereafter.

Provided, however, that for distribution lines laid within the Township limits on streets forming the boundary lines between Wilkins Township and other municipalities, the Township shall pay for the whole of such lines, but the Water Company shall refund to the Township such sums as it may collect for the use of such lines by such adjoining municipalities for municipal purposes as may be necessary to equitably apportion such charges between the Township and such municipalities; and to this end Wilkins Township agrees to cooperate with the Pennsylvania Water Company in arranging for such equitable apportionment in all cases affecting the Township.

Basis of computation

Tenth: That for the purpose of fixing the compensation provided for in Section 9 of this agreement, it is hereby agreed that the number of miles of distribution pipe lines to be laid in Wilkins Township by the party of the first part under this agreement is 632.4 ft. or 1.1977 miles, as shown by the schedule of pipe lines hereto attached and marked "Exhibit A"; and that the number of fire hydrants to be placed in service on said pipe lines is thirteen (13) as shown by list of said fire hydrants marked "Exhibit B", and attached hereto. It is further agreed

Ordinance No. 5/8. Contd.

that the pipe and hydrants listed in "Exhibit A & B" shall be furnished and installed by the party of the first part within ninety days (90) after the approval of this agreement by the Public Service Commission of the Commonwealth of Pennsylvania as required by the Public Service Company law.

For the purpose of determining what shall from time to time be paid under this contract, it is further agreed that the schedule of "Exhibit A" shall be increased by the length of the extensions of the distribution pipe system which may hereafter be laid to provide proper and adequate service to Wilkins Township or the owners of property within the said Township: Provided, however, that in case the party of the first part should extend its distributing pipe lines within the Township to reach unimproved property or property from which there is no demand for a supply of water at the time the extension is made, (the cost of said extension being advanced by the owner or owners of the property petitioning the first party for said extension) the distribution pipe line or lines so laid shall not be included with that upon which the bills for fire protection shall be based; but upon an application for domestic supply of water for a property located on such an extension of the distribution pipe system within the limits of Wilkins Township and the repayment by the party of the first part a part or all of the cost which was advanced to it for the laying of said line, then, all of said extension or such part of it as is represented by the amount of the cost repaid shall be included in the distribution pipe system of Wilkins Township upon which the annual rate per mile shall be computed.

Eleventh: This agreement shall go into effect as of 20th of April 1915, and shall continue in force and be binding on both parties for the term of ten (10) years from that date.

Twelfth: It is hereby understood and agreed that it is not the purpose or intent, nor is the obligation of this contract, if and when approved by the Public Service Commission of the Commonwealth of Pennsylvania, such as to impair or in any wise affect the exercise of said Commission of any of the powers vested in it by the Public Service Company Law approved July 26th, 1913.

Within the areas where excavation and fills will be made, all trees, brush and heavy grass shall be removed: Fill areas where the original surface is quite steep shall be cut into steps for thoroughly binding the embankment to the original ground. Embankments shall be formed of approved materials in horizontal layers not more than twelve (12) inches in depth for the entire width of the fill, and shall be spread uniformly and rolled until thoroughly compacted by a three (3) wheeled power roller weighing not less than ten (10) tons. Frozen materials shall not be placed in embankments. Large stones shall be broken into pieces no larger than eight (8) inches in their greatest dimension.

During construction the street area shall be kept shaped and drained at all times.

Concrete Curb

A. A concrete curb must be constructed on both sides of all streets. It shall have a minimum thickness of eight (8) inches and shall be twenty-four (24) inches in depth. B. Materials.

The following materials shall be used for the concrete curb.

A. Coarse aggregate for use in drain shall be Pennsylvania 3A blast furnace slag.

B. Transit mix concrete, proportioned one (1) part cement, two (2) parts sand, three (3) parts Pennsylvania 2B gravel. Proportioned by weight.

C. Construction Methods.

The curb trench shall be excavated true to line and grade, twenty (20) inches in width. The sides of the trench shall be vertical.

The coarse aggregate shall be placed by hand methods. Dumping of aggregate from trucks into the trench will not be permitted.

Underdrain shall be placed immediately in advance of curb construction. All underdrain in advance of completed curbing shall be protected from damage by burlap or tar paper. Underdrain which has been damaged by mud shall be removed and be replaced with clean aggregate.

The forms for concrete curbing shall be of metal for straight, free from warp and of sufficient strength when braced to resist the pressure of concrete without springing. At least three (3) braces shall be used for each ten (10) foot section.

The tops of the forms shall be set true to line and grade and fastened together in a manner to permit the removal of the face forms. Steel division plates shall be used to separate adjacent sections of curbing. All forms and division plates shall be cleaned and oiled each time they are used.

All transit mixed concrete shall be mixed on the site of the work, and to a consistance satisfactory to the Engineer. Concrete shall be placed in the forms in horizontal layers and tamped and spaded until mortar covers the surface. Where directed by the engineer, drainage openings shall be made through the curbing. Curbing shall be depressed at driveways as directed by the engineer.

The back forms shall remain in place for at least 24 hours after pouring concrete. As soon as the curbing has received its final finish it should be covered with wetted burlap, double thickness. The burlap shall be kept moist for 72 hours after pouring curbing.

After the curbing has been cured, the space in the pavement side shall be backfilled with course aggregate from the top of the tile underdrain

to the level of the subgrade and the space along the back of the curb shall be backfilled with course aggregate to a distance 12" below the top of the curb.

Subgrade

After curbs, storm sewers, water lines, gas lines, and sanitary sewers (if any) have been constructed, the subgrade shall be formed, to the required elevation and cross-section by shaping the roadway surface with approved materials and shall be brought to a firm, thoroughly compacted surface for the full width of the pavement, by rolling with a power roller weighing not less than ten (10) tons. All unsuitable material which will not compact satisfactorily shall be removed and replaced by satisfactory material as directed by the engineer.

Base Course

Base course shall be eight (8) inches in depth after final compacting.

A. Materials.

Course aggregate shall be broken stone Pennsylvania Department of Highways, Type B, Number 4 slag or air cooled blast furnace slag of the quality commercially known as Run of Bank Blast Furnace Slag.

B. Methods of Construction

The base course shall be constructed in two (2) courses. The bottom course shall be spread and rolled three (3) to four (4) inches in depth.

The course aggregate for the top course shall then be placed and leveled to the required elevation, and cross-section in such manner as to avoid segregation of the finer material. All lumps over six (6) inches in their maximum dimension shall be broken up or removed. The base course shall then be thoroughly compacted by rolling with a ten (10) ton three (3) wheeled roller.

The rolling shall start at the curb line, progress to the center, be parallel to the center line, of the roadway, uniform lapping each preceding track and covering the entire surface with the rear wheels, and continuing until the material does not wave or creep ahead of the roller wheels. As the rolling progresses the surface shall be checked with templates and straight edges and material removed or added as required to bring the surface to a true-cross-section. After the course material has been satisfactorily rolled, Pennsylvania I B slag shall be uniformly spread over the surface and rolled and broomed until the voids are filled satisfactorily.

Surface Course.

The bituminous material for the surface course shall be tar or asphalt but shall not be applied unless the air temperature is over fifty (50) degrees F.

The surface course shall be either of premixed material compacted to a minimum thickness of one and one-half (1½) inches after rolling or of a penetrated material of two (2) inches thickness after rolling. If the penetrated surface course is used, it shall be made up of stone or slag ranging from one (1) inch to one-half (½) inch, and the bituminous material placed with an approved distributor truck at the rate of a total of two (2) gallons per square yard, with a final rolling after chips have been applied for the seal coat.

If the premix material is used the base course shall be swept clean and shall receive a tack coat of asphalt applied at the rate of fifteen one hundreds (0.15) gallons per square yard, before the premix material is placed.

4. Storm sewers must be constructed and catch basins (Allegheny County Standard) provided, in accordance with the approved preliminary plans at all locations shown thereon.

5. All bituminous materials shall conform to all the requirements of the Pennsylvania Department of Highway Specifications, Form 408, January 1941, and all supplements thereto which are in effect. The subdivider shall furnish at his own cost a certificate of approval from an approved Testing Laboratory for all bituminous materials.

ORDINANCE No. 179

AN ORDINANCE OF THE TOWNSHIP OF WILKINS, ALLEGHENY COUNTY, PENNSYLVANIA, REGULATING AND RESTRICTING THE CONSTRUCTION OF DITCHES FOR THE LAYING OF GAS SERVICE LINES FROM BUILDINGS TO STREETS, HOUSE APPLIANCES, CONNECTIONS, ETC.; THE PLACING OF GAS METERS ON PREMISES; PROVIDING FINES AND PENALTIES FOR VIOLATIONS, SO AS TO PROMOTE THE HEALTH AND SAFETY OF THE PEOPLE OF SAID TOWNSHIP.

WHEREAS, it is the purpose of the Board of Commissioners of Wilkins Township, to provide a maximum degree of safety to residents and properties within Wilkins Township and to promote the general welfare of the people:

The Board of Commissioners of Wilkins Township do hereby enact and ordain:

SECTION 1. That gas meters, wherever possible, be placed on the outside of all buildings and structures and above ground. The outlet pipe from the meter should enter the building above ground level. Where gas service lines run through the cellar wall or walls, both sides of the wall or walls must be carefully cemented. For cellar walls of hollow tile or cement block construction, it is recommended that a suitable conduit for service line be placed through the wall. Inside and outside of conduit opening must also be cemented. It is the sole obligation and duty of the owner of the premises, either directly, or through his agent, servant or employee to run the service line from curb box to the meter and from the meter to the house lines.

SECTION 2. Service lines being installed from curb or shut-off box to meter, etc., particularly involving house line installations, shall be of standard black steel pipe or, its approved equivalent. Copper pipe or tubing is prohibited. No bushings or cast iron fittings are to be used on any service line or on any part of the house lines. Where necessary to use more than one section of pipe in the service line, from the curb box to the meter, sections should be joined with a dresser type coupling, or equal approved standard and acceptable by the utility companies serving natural gas within the limits of the Township. The service line installations must be left open for inspection by accredited company representatives of those utility companies furnishing natural gas and the company representative must witness and verify the normal standard pressure tests. Service lines or house lines must not be concealed under the floor of any basement or the floor of any dwelling having no basement. Lines must be in accessible location for periodic inspections. Any deviation from this practice must be referred to the gas company for approval.

SECTION 3. The ditch in which service lines are laid from the curb to the house should run in a straight line from cellar wall to curb and the depth of such ditch shall be at least eighteen (18) inches below the finished grade. Where feasible, this service line shall be laid upon solid ground and the bottom of the ditch shall be of even surface and uniformly finished. In backfilling the trench, the soil, earth, clay or other approved material, shall be hand backfilled to a depth of at least twelve inches, and such backfill shall be firmly compacted in and around the service line. Heavy or mechanized equipment shall only be permitted when same is approved by the proper representatives of the gas company. Under no circumstances shall the gas service line be laid in a slag or cinder fill. Red dog and heavy stone or any other object of great weight is prohibited in any part of the ditch in which is enclosed the service line.

Where the service line is to be laid on filled ground or what is sometimes known as "made" ground or fill, the base or bottom of the ditch shall be thoroughly compacted and uniformly finished in such manner as will meet the approval of the inspector or representatives of the gas company.

SECTION 4. All household appliances using gas as fuel shall be properly valved. These valves or stop-cocks must be so installed as to be easily accessible; any type valve approved by the gas companies shall be considered as approved by the Township of Wilkins. Soft valves shall not be used.

Only appliances which are fully portable in nature shall be connected with a gas hose. Appliances equipped with a control valve or valves which permit complete shut-off of the gas supply shall not be connected with gas hose. This regulation shall not apply to hand torches, gas irons, and other equipment which requires both the mobility possible only with flexible connection and frequent and accurate burner control at the point of use.

Water heaters shall not be installed in bathrooms, bedrooms, or any occupied rooms normally kept closed. All appliances using gas as a fuel should be vented.

SECTION 5. All house lines must be securely strapped, hooked or supported to the ceiling or wall and all drop and bracket straps must be securely fastened in place. Rubber hose or lead connections will not be permitted.

SECTION 6. In those instances where, by reason of the location of the buildings to the streets, business properties, etc. it is not possible to have the service line buried 18 inches below the ground surface, special exceptions are herein granted, but the owner, his architect, agents, servants or employees must obtain written consent from the utility company supplying gas, and a certified copy of same sent to the Township office where same shall be permanently recorded.

SECTION 7. It is recommended that in all instances where outside meters service installation may be delayed for any reason or delayed by reason of shortage of approved materials, etc. then, in such instances, the home owner is advised to vent the service line as near to the outside foundation walls as possible. It is further recommended that all property owners contact their respective service companies for advice and information at all times concerning gas, gas lines and appliances, etc. both within and without the residence.

SECTION 8. For each and every violation of the provisions of this Ordinance the owner, general agent, or contractor of a building or premises where such violations have been committed or shall exist, and the lessee or tenants of the property, building or premises where such violation has been committed or shall exist and the owner, general agent, contractor, lessee or tenant of any part of a building, property or premises in which part such violation has been committed or shall exist, and the general agent, architect, builder, developer, or any other person who normally commits, takes part or assists in any such violation or who maintains any building or premises or property in or upon which such violation shall exist, shall be liable on conviction thereof to a fine or penalty of not less than twenty-five ($25.00) and not more than Three Hundred ($300.00) Dollars for each and every offense. Whenever such person shall have been officially notified by the Building Inspector, Ordinance Officer, Township Manager, or any other duly authorized employee of the Township, or by service of a summons in prosecution, or in any other official manner, that he, she, or they, are committing a violation of this ordinance, each day that he, she, they, etc. shall continue such violation after such notification shall constitute a separate offense punishable by a like fine or penalty. Such fines or penalties are now collected by law.

SECTION 9. The provisions of this Ordinance are severable and if any section, clause, sentence, part or provision thereof shall be held illegal, invalid or unconstitutional, the decision of the court shall not affect or impair any of the remaining sections, clauses, sentences, parts or provisions of this Ordinance. It is hereby declared to be the intent of this Board of Township Commissioners that this Ordinance would have been adopted if such illegal, invalid or unconstitutional section, clause, sentence, part or provision had not been included herein.

SECTION 10. This Ordinance shall become effective from and after ten (10) days after its publication as required by law.

SECTION 11. Any Ordinance or parts of Ordinances conflicting with the provisions of this Ordinance are hereby repealed to the extent of such conflict.

This Ordinance approved, passed and ordained by the Board of Commissioners of Wilkins Township this 2nd day of June, 1952.
